Bencardino's LATEST DIRT

Fall 2006

A Quarterly Publication of Bencardino Excavating, Inc.

www.bencardino.com

overheard what our clients are saying about us.

"Bencardino is very safety-conscious, which helps a lot. And if I see a safety issue, they always clear it up right away, they don't argue. They're very well trained and the guys are respectful. Their foremen are also real helpful in resolving problems and working with other trades. We've always had great success with them."

Blair Godshaw, Project Manager / Superintendent
Bovis, Inc.

PROFILE

Kimberly Pierson, Dispatching & Permitting

She's the first face you see when you visit the Bencardino office, but Kimberly Pierson does more than meet, greet and answer phones. She handles warm calls, works on hauling permits and orders materials, among other things. She likes working with people and appreciates the daily opportunities to learn and grow. Even though she's been with Bencardino for five years, "It's different all the time," she says. "The only hard part is when the

guys give me orders to get for the next day at the last minute!"

On weekends Kimberly makes a point of getting outdoors with her kids. "We love going to parks, any park, it doesn't matter. We just walk around, play on playgrounds and have picnics. It's our favorite thing to do."

Linda Frye, Accounts Receivable

Linda has been in accounting for 30 years so she's comfortable with a calculator. "The challenge is when you have to upgrade to a new accounting system," she says, which has happened twice in the four years she's been at Bencardino. "It keeps it interesting because you have to re-learn the basics."

She also had to learn the difference between a backhoe and a trackhoe, a loader and a trackloader, since she had never worked in construction before. One of the nice things about working

at Bencardino is the opportunity to interface with everyone from estimators to suppliers. "You get to know more people. Your job forces you to."

When she's not working the numbers, Linda enjoys getting out to wine and music festivals in the region. She's also enjoying redecorating her home with the help of her son and soon hopes to visit her daughter in San Francisco.

FALL 2006

HOME DIRT

Processes

All operators, in muddy conditions it's important to clean the tracks at the end of the day to ensure proper wear and track life.

Progress

We just purchased two new A25D Volvo articulating dump trucks, which are now being used on the Home Depot and Neshaminy sites.

We're also now doing research on a GPS Grading System for our bulldozers to maximize production and minimize down time.
