overheard

what our clients are saying about us.

"It's really a pleasure in today's world to come up with a company that knows what they're doing and works as well as Bencardino does with others. I've been in this business about 49 years and find it's less and less common to find companies as knowledgeable and cooperative as Bencardino is showing itself to be."

-- Mike Kosoff, Senior Project Manager
Reynolds Construction Management

WINTER 2007

PROFILE Marc McKinley, Operator

How many years have you been with Bencardino?

About 11 years. It's a lot bigger than it used to be.

What's the best thing you like about your job?

The equipment is top of the line. Everything we have, there's never a problem with any job and if you need anything it's there.

Having so much machinery also makes things challenging. You're always learning something new and it never gets boring.

Any job you've been particularly proud of?

We just got finished the Home Depot job in King of Prussia. We hustled through it, everything went well, and we finished on time or ahead of time. It's probably one of the biggest jobs I did.

What's something unique that people might not know about you?

I went to art school, I never thought I'd be doing this. I took commercial art courses in tech school and high school (advertising, graphic design), and a course at Art Institute of Philadelphia. I'm into hotrods and Harley Davidsons, tinkering around with that kind of thing. I also have two sons I'm very proud of. One's at Drexel studying business; the other is at Palisades School doing really well in football and basketball.

HOME DIRT

People

Congratulations to our 2006 Award recipients as follows:

Log Book – Mike Pape
Paperwork – Fred Lloyd
Safety – John Johnson

Each of the winners will receive \$400 for their outstanding work!

Processes

Here's a reminder that we need to keep the tracks, trucks and all equipment clean. It's important to maintain a professional image and give a good first (and lasting) impression.

With regard to safety, please let Vince Stout know of any problems with equipment as soon as possible. Please don't wait for the problem to get worse and create greater issues.

Progress

We are in the process of trading in our two 330CAT Excavators for two new 80,000 lb. excavators and we are demoing CAT/Hitachi/Volvo and Komatsu. Marc McKinley is doing the comparison and has come to the conclusion that Komatsu is a heavier, stronger, and smoother operating machine. Barry Talley from Komatsu has put together very competitive pricing and great warranty and service packages to help us make our decision in choosing Komatsu.

birthdays

Happy Birthday to these employees!

Michael Flannery	February 1
Steve Borusiewicz	February 4
Rich Held	February 5
Ray McGrath, Jr.	February 15
Fred Martinenza, Jr.	February 27
John Jennings	March 2
Marc McKinley	March 3
Robert Harris	March 6
